SUMMARY

Experienced IT Infrastructure Architect with expertise in systems architecture, networking, and security. Leveraging decades of systems engineering to design resilient architectures, lead cross-functional technical initiatives, and mentor emerging IT talent.

EXPERIENCE

Aug 2025 – June 2026

University of Washington, Tacoma | Tacoma, WA

Seminar Leader – TINFO 390 (Seminar for IT Juniors)

- Selected to lead professional development and technical communication seminars for junior-level IT students.
- Facilitated structured discussions on ethics, systems thinking, and career readiness within the Information Technology program.
- Mentored students on translating technical knowledge into professional practice, including documentation standards, project scoping, and teamwork.
- Acted as liaison between students and faculty, reinforcing academic expectations and peer accountability.

Jan 2023 – Present

Olympic College | Bremerton, WA

IT Specialist II

- Collaborated with faculty and IT leadership to develop standardized procedures for software patch testing and system configurations.
- Resolved a global Microsoft Azure issue, ensuring uninterrupted service for students and staff.
- Built strong working relationships with classified and instructional staff, improving communication between IT and academic departments.
- Developed and taught a PowerShell curriculum for student employees, equipping them with scripting skills.

- Reduced mass password resets by over 99% through PowerShell automation, saving staff hours monthly.
- Designed and deployed automated software installation scripts, streamlining deployment processes.
- Established a new imaging standard with the Operations team, improving system efficiency.
- Created 5-year hardware refresh life-cycle to reduce yearly capital expenditures by \$100,000 during a single purchase year.

Nov 2001 – Nov 2019

Multimedia Game | Everi Inc. | Auburn, WA

Network & Systems Architect II

- Maintained 99.99% service uptime across 28 remote and closed-circuit data centers.
- Led multiple infrastructure projects, achieving 100% on-time delivery for system go-lives.
- Developed and enforced WSGC-compliant security baselines for gaming systems using IPsec, Cisco ASA Firewalls, and Active Directory Group Policies.
- Optimized SQL Server performance and troubleshoot field-deployed code, improving system stability.
- Automated security audits, reducing assessment time by 50% (2 hours) through PowerShell, WMI, and command-line scripting.
- Engineered custom log collection software, reducing diagnostic time by 75% (3 hours).
- Designed and deployed configurations for Cisco routers, switches, and firewalls.

Aug 1996 – June 2000

T.S.C.NET | Silverdale, WA

Technical Representative

- Mastered foundational internet routing and transport protocols (TCP/IP, DNS), establishing a core troubleshooting methodology for enterprise-scale connectivity issues.
- Diagnosed and resolved complex Layer 1 and Layer 2 connectivity issues, troubleshooting physical line noise, signal degradation, and protocol-level connection drops to maintain high network availability.
- Leveraged technical communication skills to guide clients through complex provisioning, client-side configurations, and remote incident resolution.

EDUCATION

Present

Master of Cybersecurity and Leadership (MCL) (Expected 2027)

University of Washington | Tacoma, WA

Science Engineering & Technology (SET) & Milgard School of Business combined credential.

Mar 2026

Bachelors of Science

University of Washington | Tacoma, WA

- Major: Information Technology
- 3.99 GPA | Graduated with High Honors
- Magna Cum Laude
- Upsilon Pi Epsilon

Aug 2023

Associate of Art Sciences

Olympic College | Bremerton, WA

- Major: IT Security
- Dean's List

Mar 2022

Associate of Art Sciences

Olympic College | Bremerton, WA

- Major: IT Networking
- Dean's List

TECHNICAL EXPERTISE

- **Network & Systems Architecture** – Design, deployment, and security
- **Automation & Scripting** – PowerShell, Python, Bash, VBScript, JavaScript, C, C++, Java
- **Security & Compliance** – Active Directory, PKI, IPSec, VPN, Cisco Firewalls
- **Cloud & Virtualization** – Hyper-V, VMware, Azure, AWS, O365
- **Database Management** – Microsoft SQL Server
- **Operating Systems** – Windows, Linux, macOS

PROFESSIONAL STRENGTHS

- **IT Mentorship & Training** – Teaching technical concepts and leadership
- **Problem Solving & Troubleshooting** – Root cause analysis and rapid remediation
- **Process Optimization** – Automation, auditing, and workflow efficiency

CERTIFICATIONS

- **Certified Hacking Forensic Investigator (CHFI)** – EC Council (#ECC6984721305, Exp. 03/2025)
- **CompTIA Security+** – (#COMP001022033082, Exp. 06/2025)
- **CompTIA Network+** – (#COMP001022033082, Exp. 06/2025)
- **CompTIA A+** – (#COMP001022033082, Exp. 05/2025)

LEADERSHIP & SERVICE

Dec 2025 – Present

Drumline @ UWT | University of Washington | Tacoma, WA

- Founded and established the UWT Drumline as a Registered Student Organization (RSO), authoring its governance structure, bylaws, and operational procedures from inception.
- Coordinated with university administration, faculty advisors, and student leaders to secure institutional funding and build a sustainable performing arts program.
- Developed a long-term leadership pipeline and peer-mentorship model to ensure organizational continuity.

SELECTED PROJECTS

- **Pin: LLM-Driven IT Ticket Triage System**

Designed a Tier-0/Tier-1 AI support model leveraging retrieval-augmented generation (RAG) to reduce technician workload while preserving documentation boundaries.

Repository: <https://www.github.com/joshsimp-uw/Pin>

- **Network Tetris (VLSM Pedagogical Tool)**

Developed an interactive instructional framework utilizing the Bit-Borrowing Block Boundary (4B) method to streamline complex subnetting education.

Repository: <https://www.github.com/joshsimp-uw/NetworkTetris>

- **Infrastructure Automation Tooling**

Ongoing development of PowerShell-based automation frameworks for identity management, imaging, and compliance validation.
